**PRODUCER PRICE INDICES  
FOR MANUFACTURING /PPI-M/  
(2011=100)  
FOURTH QUARTER OF 2012  
OCTOBER 2012 TO DECEMBER 2012**

**Central statistical agency**

**Addis Ababa**

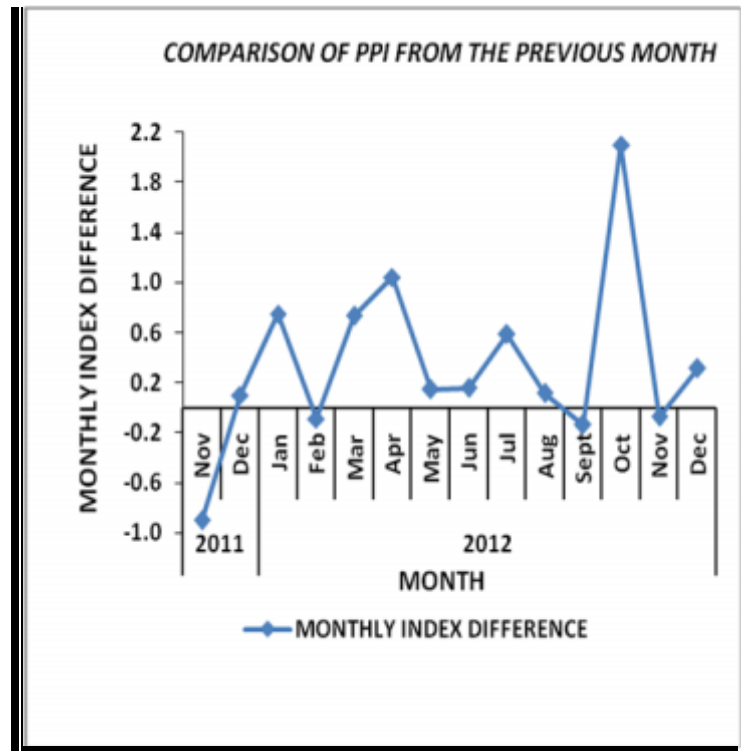

**April 2013**

---

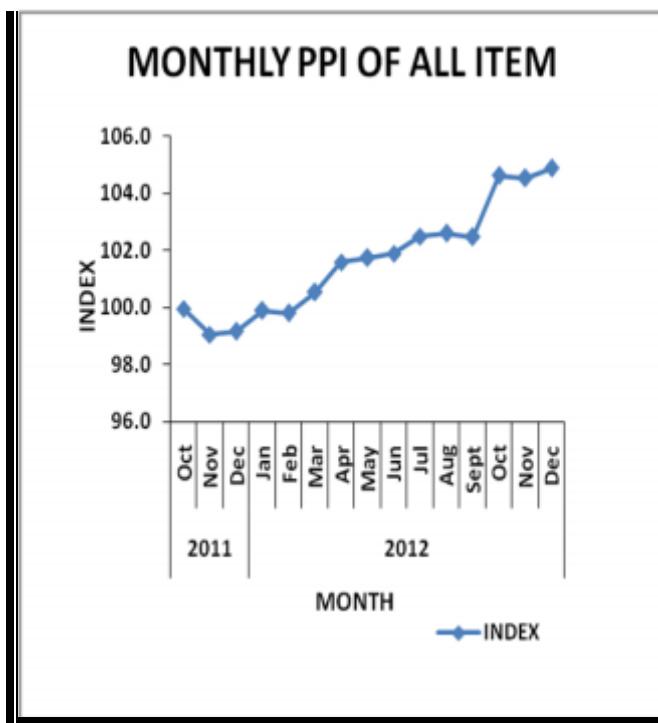

# INTERPRETATION

## 1. PPI – Total Manufacturing

In the fourth quarter of 2012, Producer Price Index for Total Manufacturing exhibited an increase of 2.1 percent in October, a decrease of 0.1 in November and an increase of 0.3 in December, compared to the previous month, i.e. as shown in Table 2 and the corresponding figure (Figure 1). Compared to the previous year's same quarter, total Producer Price Indices increased by 4.7, 5.5 and 5.8 percent in October, November and December, respectively. As depicted in Table 3, this increase in producer prices of manufactured products was caused mainly by the rise in producer prices of items food, beverage and tobacco. As compared to previous year's same quarter (fourth quarter of 2011), Producer Price Index increased by 5.3 percent in the fourth quarter of 2012 (Table 4).

*Figure 1:* Monthly Producer Price Indices for all items (compared to the previous month)

**Figure 2:** Monthly Producer Price Indices variations for all items.

### 2. PPI – Food, Beverage and Tobacco

The producer price indices of food, beverage and tobacco stood at 99.9, 99.7 and 99.8 in October, November and December as depicted in Table 1. Compared to the previous month the index exhibited an increase of 2.3 and a decrease of 0.1 percent in October and November respectively and also there is no difference in December (Table 2). As shown in Table 3, compared to the same quarter in 2011, producer price indices exhibited a decrease of 0.6 percent in October and an increase of 2.3 and 3.2 percent in November and December respectively. The percentage change in producer price indices revealed that there was a 1.6 percent increase in prices of food, beverage and tobacco products in this quarter compared to the previous year’s same quarter as shown in Table 4.

### 3. PPI – Other than Food, Beverage and Tobacco

The monthly producer price indices for manufacturing products other than food, beverage and tobacco products stood at 107.0, 107.0 and 107.5 in October, November and December, respectively as shown in Table 1. Table 2 shows that, producer price indices have increased by 2.0 percent and 0.4 percent in October and December respectively, and there is no difference in November. On the other hand, compared to previous year’s same period, producer price indices exhibited a 7.4 percent, 7.1 percent and 7.0 percent rise in October, November and December respectively (Refer to Table 3). This rise was mainly due to the increase in prices of bodies for motor vehicles, trailers and semi-trailers. The percentage change in producer price indices between the corresponding quarters also indicated that there was a 7.2 percent increase in prices of products other than food, beverage and tobacco products as shown in Table 4.

#### Remarks

1. In this report there are some products which are excluded after the third quarter from the basket for last and it shows some difference from the previous quarter report. See from table 1 to table 4.
2. In the previous base year /2005=100/ PPI, there was no ISIC type 1511 /production, processing and preserving of meat and meat products/ but in the new base year /2011=100/ price index it is included.
